

25 AI Prompts for Busy Professionals

EMAIL · MEETINGS · DOCUMENTS · PLANNING · CAREER

Copy, paste, and fill in the [brackets]. Works with ChatGPT, Claude, Gemini, or any AI assistant.

No coding. No jargon. Just time back.

From AI Notes — daily workflows at [@ainotes.daily](https://ainotes.daily)

Before you start:

the 4-part formula

Every prompt in this pack follows the same skeleton — Role (who the AI should be), Context (what it needs to know), Format (what “done” looks like), and Constraint (the guardrails). When a prompt here almost fits your situation, adjust one of those four parts rather than starting over. And one rule that never changes: never paste confidential, client, or work-sensitive data into a public AI tool. Sanitize first — replace names and specifics with placeholders.

EMAIL

01

Inbox triage

Here are the emails in my inbox this morning: [paste subject lines or full emails]. Sort them into three lists: urgent (needs a reply today), reply-now (under 2 minutes each), and batch-for-later. For the urgent ones, tell me in one line what each sender actually wants.

02

Thread summarizer

Summarize this email thread. Give me: what they want, what’s urgent, any deadlines mentioned, and a 3-line reply I can send. Thread: [paste]

03

The hard reply

Help me reply to this email: [paste]. I want to say [your honest, unpolished version]. Rewrite it so it’s professional, direct, and keeps the relationship intact. Under 120 words.

04

Follow-up nudge

Write a polite follow-up to someone who hasn’t replied in [X days] about [topic]. Friendly, zero guilt-tripping, ends with a clear yes/no question. Three sentences max.

05

Voice memo to email

Turn this rambling transcript into a professional email to [person]: [paste transcript]. Keep my main points, cut the rambling, friendly-direct tone.

MEETINGS

06

Notes to actions

Turn these raw meeting notes into three sections: decisions made, action items with owners and deadlines, and open questions. Flag anything assigned to me. Notes: [paste]

07

Agenda builder

Create a tight agenda for a [30/60]-minute meeting about [topic] with [attendees]. Time-box each item, put decisions before discussions, and cut anything that could be an email.

08

Calendar defense

Here's my week: [paste calendar]. Flag anything that could be an email instead of a meeting, anything missing an agenda, and draft a polite decline-or-shorten message for each.

09

Pre-meeting brief

I have a meeting with [person/team] about [topic] in 10 minutes. Here's the background: [paste]. Give me: the 3 things I need to remember, 2 questions I should ask, and 1 thing to avoid bringing up.

10

The recap

Write a follow-up message for the meeting we just had. Attendees: [list]. What happened: [2-3 messy sentences]. Format: thanks, decisions, action items with owners, next check-in.

DOCUMENTS

11

First draft anything

Write a first draft of [document type] about [topic] for [audience]. Rough is fine — I'd rather edit than start from blank. Use this background: [paste]. Keep it under [length].

12

The tightener

Cut this text by 40% without losing any substance. Keep my voice. Flag anything that was pure filler so I learn: [paste]

13

Jargon translator

Rewrite this for someone smart but outside my field. No jargon, no acronyms without explanation, same level of accuracy: [paste]

14

Doc reviewer

Review this document as a skeptical [boss/client/lawyer]. What's unclear, what's missing, what will they push back on? Rank the issues by how likely they are to come up: [paste]

15

PDF to brief

Here's a long document: [paste text]. Give me a one-page brief: the 5 key points, what changed from what I'd expect, and the one thing I'll get asked about.

PLANNING

16

Daily triage

Here are my tasks today: [list]. Order them by impact, flag the one thing that matters most, mark anything that can be shortened to a 15-minute version, and tell me what to drop entirely.

17

The forgetting check

Based on today's plan — [paste] — what am I forgetting? Think about: people waiting on me, deadlines this week, and prep for tomorrow.

18

Project kickoff

I'm starting a project: [describe in 2 sentences]. Break it into phases with milestones, list the risks in order of likelihood, and tell me the first three concrete actions for this week.

19

The delegation drafter

I need to hand off [task] to [person]. Write instructions clear enough that they won't need to ask me questions: goal, steps, what good looks like, common mistakes, and deadline.

20

Weekly review

Here's what I planned this week vs. what happened: [paste both]. What patterns do you see? What should I plan differently next week? Be blunt.

CAREER

21

Brag document

Turn these messy notes about what I did this quarter into 5 crisp accomplishment bullets with impact numbers where possible. Format for a performance review: [paste]

22

The awkward ask

Help me ask my manager for [raise/promotion/flexibility]. Draft the opening message and the three strongest points from this context: [paste]. Confident, not apologetic.

23

Interview prep

I'm interviewing for [role] at [company type]. Ask me the 8 hardest questions they're likely to ask, one at a time, and critique each answer before moving on.

24

Skill gap map

I'm a [role] who wants to [goal] within [timeframe]. What are the 3 highest-leverage skills to build, and what's a realistic weekly practice plan for each — 30 minutes a day max?

25

The update that writes itself

Turn this week's work log into a status update for my boss: [paste log]. Format: wins, in progress, blocked, and what I need from them. Confident tone, under 150 words.

That's 25.

Want the daily version?

These prompts are the starting lineup. Every day we break down one new AI workflow — the tool, the exact prompt, and when to use it — on Instagram at [@ainotes.daily](#), and the best of each week lands in the free newsletter.

One email a week. The workflows that actually save time. Nothing else.

You're already on the list — this PDF came from it. Send it to the coworker who's still doing everything manually.
